

Hi, my name is Mike Morey, I am the president of Oakbrook Corporation. Oakbrook Corporation was formed 27 years ago. We manage a lot of different facilities, we are involved with a lot of different partnerships. And so primarily the kind of work that we've done with SVA has been in the area of property management accounting, tax returns, and annual audits. Those are the heart and soul of the organizational nature of real estate. And having a partner like SVA, who has that level of expertise, that can bring the consulting aspect along with it, has been very very helpful for us.

I've enjoyed these 40 years in working with SVA. The people are great people to work with. Over that time period there's been a lot of changes. One of the good thing is that SVA is an organization of the size that they can continuously meet the needs as we grow and they grow. As far as the technical aspect of it, they're very authoritative but on the same on the same hand, they're very practical. And the organization and timeliness with which they address the needs that we have has been outstanding. We provide a pretty lengthy array of services that are designed to satisfy the ownership needs of a company that's involved in real estate. One of the many attributes that SVA brings with them as a as an accounting firm is that they have a very deep knowledge in areas that are quite technical and complicated, complex in nature. And it's that, it's that expertise combined with the practical application that makes working with them so reliable and so satisfying.
