

Did you know that in the United States there are over 9,000 state and local jurisdictions that impose taxes on business?

Hi I'm Jake Peters, I work in our tax department helping clients navigate the complex web of multi-state taxation.

SVA can help you manage state and local tax burdens with recommendations that align with your overall business objectives. Using good business practices, our experts will identify appropriate tax positions that comply with the varying tax laws and rules administered by each state.

Our clients collectively have a presence in all 50 States, and we have the ability to help any business that has grown to a market beyond its home state's borders.

If that describes your business, take a proactive approach. The days of 'maybe they won't catch us' are long gone. There's a convergence happening of states that need cash - combined with the proliferation of technology - that allows states to use advanced cross-referencing and data mining to find businesses active in their state that aren't complying with the tax laws. It's no longer a matter of IF but WHEN they'll find you.

If this is a concern for your business, contact SVA; we'll help you craft the best approach for complying with the tax laws and make recommendations to adjust your business activity so that you don't get snared into a burdensome trap.
